

**Table 3. NORMAL LABORATORY VALUES: CSF**

| TEST                                      | CONVENTIONAL UNITS   | SI UNITS   |
|---|--|--|
| Cell count                                | 0–5 cells/ $\mu$ L   | 0–0.5 $\times 10^6$ cells/L  |
| Differential (see Table 168–1 on p. 1594) | —  | —  |
| Glucose                                   | 40–80 mg/dL (< 40% of simultaneously measured plasma level if that plasma level is abnormal) | 2.5–4.4 mmol/L (< 40% of simultaneously measured plasma level is abnormal) |
| Myelin basic protein                      | < 1.5 ng/mL  | —  |
| Protein, total                            | 15–60 mg/dL  | 150–600 mg/L   |
